Summary

My ideal workspace provides an atmosphere in which I have the opportunity to develop my skills and grow as a software engineer. I aim to become integrated into a position where I am offered the chance to improve my individual talents, as well as collaborate with some of the greatest upcoming minds of our generation. I hope to share my attained knowledge and learn from others, with the mindset of creating a dynamically developing, fully sculpted industry.
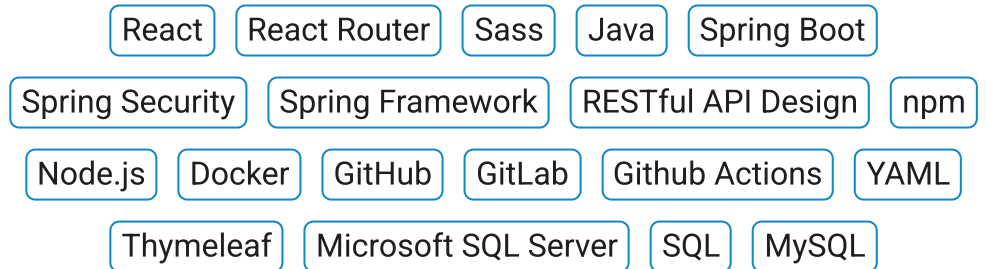

Work Experience

Senior Developer

VeriShare

Jan 2022 - Present

- Full stack developer at Verishare Software, responsible for developing and maintaining Accolade website.
- Accolade helps debt collectors at Vericred contact debtors and facilitate debt collection.
- Develop front-end and back-end using React, Sass, Axios, Java, stored procedures, GitLab, and Docker.
- Ensure website scalability, reliability, and security while meeting Vericred and client needs.
- Requires problem-solving skills, attention to detail, and ability to work in a fast-paced environment.
- Work directly contributes to Vericred's debt collection success, making role critical.

React · React Router · Sass · Java · Spring Boot · Spring Security · Spring Framework · RESTful API Design · npm · Node.js · Docker · GitHub · GitLab · Github Actions · YAML · Thymeleaf · Microsoft SQL Server · SQL · MySQL

Junior Full Stack Developer

Etse electronics

Jan 2021 - Dec 2021

- Worked as junior full stack developer at etse electronic, created a livestock tracking polygon system.
- System measured livestock location and determined if inside specific polygon, sent push notifications to users.
- Used Aurelia and .NET Core to build the system.
- Developed, tested, and ensured smooth integration with other team members' technologies.
- Required strong front-end and back-end development skills, along with expertise in specific technologies.
- Focused on accurate livestock tracking and timely push notifications for users.
- Challenging role, but rewarding to see the system work effectively.

TypeScript   Aurelia   AWS   GitLab   Node.js   GitLab   C#

.NET Core   Docker   Microsoft SQL Server   Sass

Software Developer

BlueSky Developement

Jan 2019 - Jan 2021
